

VORACE

*always code as if the guy who ends
up maintaining your code will be a
violent psychopath who knows where
you live.* — sometimes attributed to
rick osborne

now is the time to shift into high gear, ene
hasiberria. you will see subtler concepts
and we will have less time and patience to
go into the details.

besides, a game that would spell out
everything, that wouldn't really be a
game, now, would it?

the vorace is obsessed with one thing: eat
to breed its filth around the four corners
of its world. to survive it, you will have to
find food faster than her.

**your sorkariak will spend a higher
proportion of their time hunting.
move the code that hunts to a
separate chromosome and make
your strain hunt fifteen times.**

but being vicious is not enough, your
creatures must be eager to butcher thy
neighbour, running after it foaming at the
lips, their eyes wild and unblinking.

approach. step twenty times.

do you understand why the vorace is
vulnerable? do you see the importance of
being a hurried and obsessed predator?

choosing how many times we repeat an
action is also choosing the proportion of
the time we spend doing it.
